English | Tamil

## Interests

Creating responsive website, Learning new technology, Playing Games, Watching YouTube

## Projects

**Instagram Clone, *Instagram Clone using Reactjs***

12/2024 – 01/2024

**Instagram Clone:**

This is an Instagram clone website. I have just created only a few designs for the project. I will update the sections in the future. It's just a Website Design using a Front-end Framework. I have just created a simple web design home page based on without navigation. The media responsibility was okay but I will create the correct media visibility in the future. I have created the website and hosted it in Vercel to see the webpage in real-time. To see my dynamic website you can click on the below link.

**Instaclone Website Link:**

**Portfolio Website, *Portfolio Website using Reactjs***

10/2023 – 12/2023

**Portfolio Website:**

This is my personal website portfolio. I have created the website using the Reactjs Framework. On this website, the user can able to view my projects and the user can able to contact me. I have created the website and hosted it on the Vercel platform. To see my website you can click on the above link. But it will be responsive in Desktop view on a PC. I will update my website in the future.

**Portfolio Website Link:**

<https://oibsip-task-2-weld.vercel.app/>

**Survey Form, *using HTML,CSS,Javascript***

10/2023 – 10/2023

**Survey Form:**

I have created a survey form using HTML, CSS, and JavaScript. Users can give their reviews based on their interests and then submit the form.

**Survey Form Link:**

<https://algobulls-nine.vercel.app/>

**Landing Web Page, *using HTML,CSS,JS***

10/2023 – 10/2023

**Landing Website Link:**

<https://yuva-raj2.github.io/OIBSIP/Landing%20Page/>

**Skill Job Recommendation, *using HTML,CSS,Javascript***

06/2023 – 07/2023

**Skill Job Recommendation Website Link:**

[https://yuva-raj2.github.io/OCTANET\\_OCTOBER/skilljob-main/skilljob-main/](https://yuva-raj2.github.io/OCTANET_OCTOBER/skilljob-main/skilljob-main/)

**Ecommerce Website, *Ecommerce Website using Django***

02/2023 – 05/2023

**Ecommerce Website using Django:**

I worked on an e-commerce website mini project using Django website design during my third year, under the guidance of "Dr. Venkatesan". The website allows users to purchase products using Phonepay and add items to their cart. The minimum required products to purchase from the website will be available. The items will be stored in the database by default as Django has the feature to store data in the server's database. The e-commerce website has been uploaded on GitHub and you can find the source code by clicking on the link below.

**GitHub Source Code Link:**
